LITHIUM COMPLEX GREASE EP 2
High Performance and High Temperature Grease

**Description**
Lithium Complex Grease EP 2 is a modern highly qualified grease, with lithium complex as a thickener.
Due to the lithium complex soap, the antioxidants, the corrosion inhibitors and its EP/AW additives, this grease has the following capacities:
- Very high mechanical stability
- Outstanding anticorrosion protection
- Withstands high temperatures
- Prolongs the intervals of re-lubrication
- Suitable for applications within a wide temperature range
- Universal grease for both industrial and automotive industry

**Quality level**
NLGI 2

**Available in**
Carton of 24x400 Gr (Tubes)
Bottles of 1 and 5 Kg.
Barrels of 18, 50 and 180 Kg.

**Application**
Suitable for all types of bearings, including those who operate under heavy load conditions for both industrial and automotive industry.
